Priopriety is the basis

I'm sure that not once You have wondered if You are raising Your kid in a good way. Maybe somebody has pointed to Your attention that You are not doing it well, or in a generally accepted manner of being a good parent, or maybe Your child is not behaving in an expected way.

You may ask Yourself what You should do, and how to act? And what is the proper way to raise Your child?

Priopriety is all about consistent conduction of some parental concept, which is based on dignified handling of the child. Is there any other way to do it?

Presently we can see how different styles of raising a child are promoted ranging from permissivism (allowing Your child to do anything he/she wishes) up to authoritarian concepts.

The concepts created by Tracy Hogg, Deborah Carrol, Stella Reid and other "super baby-sitters" are becoming more and more popular.

The movement based on the idea of "parenthood of closeness" – idea promoted by dr William Sears, which is slowly making its way into polish ecoparenting mainstream .

About positive reinforcement, meaning about catching a kid redhanded on what is He doing good/well!

Positive reinforcement has nothing to do with telling a kid in a idolatrous way that everything is great. Appreciate Your kids success, and appreciate his efforts!

Zuzanna Taraszkiewicz

We would like to pass the Holiday greetings for the new year 2017 to all the parents, children and teachers.

We wish you only the best happenings, interesting stories, nice surprises, sense of humor and that You will finally believe in Yourself.

Remember that life does not only consist of hard work and learning.

Above all life is about development, everyday hard work on selfimprovement, building of good relationships, strengthening ties with those who we love, and that are present in our lives.

Every day reality is about continuous learning – so that's why we wish You and ourselves – that we will be able to use that.

Health is above all the most important thing – we have to take good care of it.

Please accept kindest, warmest wishes from our whole team from "Mam Dziecko w Szkole" and let the "Grand Game for the Potential and Health of our Children" assists us in everyday life.

THE GRAND GAME

FOR CHILDREN'S POTENTIAL & HEALTH CAMPAIGN

BINGO

Are you doing well?	Can I help You in anything?	I'm sorry, that I've got carried away//nervous	I'm happy that You're trying
BRAWO!	It's great that You're asking	I'M PROUD OF YOU!	<i>I believe that You'll succeed!</i>
<i>Can You please help me right now...</i>	<i>Good question!</i>	Do You want me to help You?	I will gladly listen to You in a moment, ok?
With every step You're closer to the target	You have a right not to know. You're not a scientist!	Is this very important to You?	Tell me what did You feel when ...?
Can I hug You ?	Would You like me to seat with You?	Practice, makes perfect, try again...	No one knows everything from the beginning!
Together we will make it! Together we will achieve it!	Maybe next time we will make it happen?	It's good that ou're here!	I love You anyway!

Instruction

This a very simple Bingo. The game is based on communicating with a child in such a way, that You are supporting him, and not hurting him; giving him courage – instead of scaring him!

To support the kid with optimism – and not to expose his failure.

The child should always feel our support, interest, and love!

By saying these words – you always win!

How can I know if I will succeed?

When You reach a point when You think You will be unable to do it, simply add a question mark at the end of this sentence. It is a simple but effective way, to step forward. Tony Robbins asked the audience at one of his training courses: "who would jump into the lake filled with crocodiles, or jump into the burning house, located on an island in the middle of a lake to retrieve million dollars".

I thought to myself "Never". What if it wasn't a million dollars, but it was Your child that stayed there? Are You sure that You know what You are incapable of?

A space for change

Everyone, including kids, and teenagers, can solve problems, and benefit from a positive change, but it may be too hard to do it on his own. Students, as well as whole communities of the six Schools having the power to change the world (Ashoka Change Maker Schools) have the luck to evolve surrounded by people who favor them, and also in the space that favors them.

Martyna Rubiniowska

Lets leave our children alone!

But who's able to do it? When the parents are under continuous pressure from their surrounding, their school, concentrated TV, press, and advertising action, abundance of toys, and educational programs, pressure on building their careers, and development paths for their children since their early age, along with the idea of the intellectual stimulation, and the idea of the race to a better future, which then changes into the production of a "genius". Who can say no to such a way (avalanche) and such a perspective?

INSPIRATION

Instead of underlining
the hardships and problems
try today (tomorrow, day after tomorrow...)
to exaggerate goodness,
happiness and luck!
